5. Capacity building

GLOSSARY OF ABBREVIATIONS

APROSAIC	Association of settlers for the economic, social and cultural development of the village of Santa Cruz de la India and nearby communities
CAPS	Potable Water and Sanitation Committee.
MARENA	Ministry of the Environment and Natural Resources
MEM	Ministry of Energy and Mines
SILAIS	Local system of comprehensive health care
NGO	Non-governmental organizations
INIFOM	Nicaraguan Institute for Municipal Development
INATEC	National Technological Institute
ENATREL	National Electricity Transmission Company
UNI	University of Engineering
UNAN León	National University of León
ESIPSA	Professional internal security company S.A.
EIA	Environmental Impact Assessment
INAFOR	National Forestry Institute
DAEM	Explosives and Weapons Directorate
ENACAL	Water and Sanitation Company
COPTRAMIN	Cooperative of Production and Work of Traditional Artisanal Miners of La India Community

Condor Gold has developed an internal prevention protocol with our employees, which includes sanitary measurements within the installations and towards the surrounding communities, such as:

- Talks given and written pamphlets on sanitary measurements and COVID-19 prevention were distributed to employees.
- Avoid social gatherings as much as possible and promote social distancing in common areas.
- Use of masks for employees is obligatory in the installations and villages.
- Cleaning outside and inside of vehicles after each use.
- Alcohol spray (small) is distributed for all employees and for desk/computer cleaning.
- Benzalkonium chloride is distributed for all the employees to use in their houses to clean surfaces.
- Disinfectant booth, washing hands, shoe disinfection and thermometers are used at the entrance of the offices.
- Suppliers are met outside the office areas to reduce contact with employees.
- Guidelines for kitchen area and cleaning procedures have been modified and the use of common items has been eliminated.
- Villagers in the social programs and local schools have received talks, as well as sanitary supplies (alcohol, chlorine, etc).

As of November 2020, Condor Gold regained normal activities, all employees working full time, but with sanitary measurements and social distancing and sanitary measurements being implemented to avoid spreading of Covid-19 and ensure the safety and health of its employees and surrounding communities.

Executive summary

The following report covers the period from October to December 2020, including the environment, social, health and safety and human resources areas.

Condor continues to implement its Environmental and Social Management System, which includes Environment, Community, Health and Safety and Human Resources. Activities were restarted in November with sanitary measurements and social distancing in place.

Environmental work was focused on monitoring of groundwater and surface water level, monitoring of weather parameters, water management, waste management and recycling, maintenance of the tree nursery "Oro Verde" and maintenance of four reforestation areas located in La India and Real de la Cruz concessions. Implementation of the Participatory Water Monitoring Program including water quality sampling in La India, America and Tatiana projects, and presentation of results of the 2nd quarter took place. Daily 5-minute talks to environmental workers, support to administrative area; environmental awareness activities with co-workers, support to León zoo as part of the Biodiversity program were also undertaken.

Other activities included delivery of the environmental quarterly reports to government institutions, baseline studies advanced on SWWB, follow up on the kinetic study for ARD, river sediment sampling, coordination of the water project and its environmental application process, update of the forestry inventory in the three projects, environmental supervision during drilling campaign as well as earthworks for the two new viewpoints and supervision of clearance of the areas within the plant location. The Company also received an inspection to Espinito-Mendoza and Cacao concessions by MEM technicians.

The tree nursery "Oro Verde" holds a total of 5439 plants, which are watered, fertilized and kept clear of weeds and pests as part of its maintenance program. Activities in the reforestation areas included cleaning, fertilizing, watering and pest control. A total of 76 trees were used to replace trees in the reforestation area of Nance Dulce. There was a decrease in plants affected by pest and too much water due to the hurricane events in November. Mostly ornamental and medicinal plants were affected.

The social area continues to work on maintaining the social license with the communities neighboring the mining project through various relationship programs and various communication actions with stakeholders.

The company's social investment has focused on social programs: Contributions and Donations, addressing issues related *inter alia* to education, health, sports, community mourning; during this period, 95 contributions were delivered to individuals and organizations. Agua Fresca program benefits 392 families from the Santa Cruz de la India village, Agua Fría village and 26 property owners. Seniors program has 95 members; APROSAIC, that works with the communities neighboring the project; Agua es Vida program, which has 160 members; Businesses program, with 80 entrepreneurs; Jóvenes en Acción program, which benefits 26 youth; and Happy Childhood, which benefits 36 children. For this quarter, focus was mainly on supporting community health in Covid-19 prevention activities.

This quarter we carried out activities that allowed us to maintain good relations with communities, generating trust and ownership with the project, such as: coronavirus prevention campaigns and actions through all programs, starting with ourselves and thus, serving as an example to the community.

This quarter, important support was provided to the land acquisitions team to advance the Company's strategy for the purchase of properties; the Company also conducted annual meetings with all social programs, reminding its members of all the contributions and efforts made during the year.

The company continues to support training and capacity building of its employees, providing financing and scholarships for English courses, and Masters programs .

1. INTRODUCTION

This report is part of Condor Gold’s commitment to continuous improvement and monitoring of the implementation of its Environmental and Social Management System (ESMS) in the areas of Environment, Social and Community Relations and Human Resources; ensuring transparency with its shareholders and relevant stakeholders.

2. OBJECTIVE

To inform stakeholders about the implementation of the Environmental and Social Management System in the areas of Environment, Social and Community Relations, and Human Resources during the fourth quarter of 2020.

3. ENVIRONMENTAL ACTIVITIES

3.1. ENVIRONMENTAL MONITORING

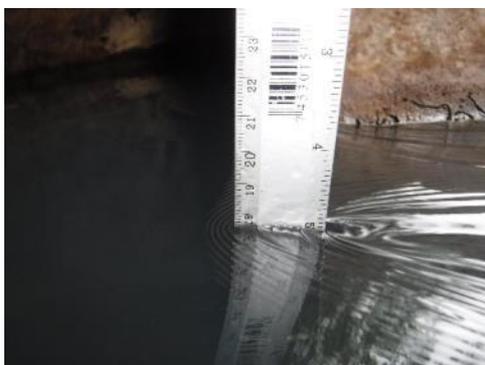

3.1.1. Baseline studies

Condor Gold continues conducting groundwater level and surface water flow monitoring, as well as gathering weather data from its digital weather station and three rain gauges (La India, Agua Fría and La Mestiza locations).

3.1.1.1. *Surface waterflow*

Monitoring of weirs continues. Constant water flow is only present in San Lucas V-notch weir (LIWR001).

In October, water level in San Lucas weir was 16cm, going up to 17.5 cm in November due to the two hurricane events. However, by the end of December, water level decreased to 16.5cm. Intermittent water flow was observed in the remaining weirs, showing constant water flow during November due to ETA and IOTA hurricanes. (Photos 3.1.1.a-e).

3.1.1.2. Groundwater level monitoring

Weekly monitoring continues; systematic monitoring was between 22 and 19 sites. Two sites had problems with access, LIWL045 and LIWL046 belong to the same landowner. However, 11 new sites were added as part of the geotechnical studies being done in the La India project areas for final designs of the Tailings Storage Facility and the water dam. In total, 30 sites are being monitored since December 2020.

In October, 3 sites showed a decrease in groundwater level of between 0.05 to 0.86 m - each being hand-dug wells, their levels are affected by usage. 13 sites showed an increase in groundwater level between 0.01 m and 2.65 m. The largest being LIDC374. 3 sites did not show any variation, LIDC047, LIDC379 and LIDC323. LIDC291 showed no changes in groundwater level, LIGT250 and LIWL10 continue to be dry.

In November, 4 sites showed a decrease in groundwater level between 0.05 to 1.92 m. All of them being hand-dug wells, which changes area affected by usage. 12 sites showed an increase in groundwater level between 0.03 m and 14.25 m. The largest being LIDC047. Two sites did not show any variation, LIDC291, and LIDC379. LIGT250 and LIWL10 continue to be dry.

In December, 13 sites showed a decrease in groundwater level between 0.03 to 6.23 m. The most variation was found in drilled hole LIDC047 and LIDC374, located in La Mestiza. Only two sites showed an increase in groundwater level between 0.01 m and 0.08 m, both hand-dug wells. Four sites did not show any variation.

Monitoring of the 11 new sites is being done daily, until the water table is stable, then they will be monitored weekly as all the others. Three new ones will be added in 2021.

3.1.1.3. Weather data

During the quarter, Condor continued registering data from the weather station and three rain gauges located in Agua Fría village, La India village in La India concession and one in Espinito-Mendoza concession.

Based on Condor’s weather station, the following data was registered during this quarter:

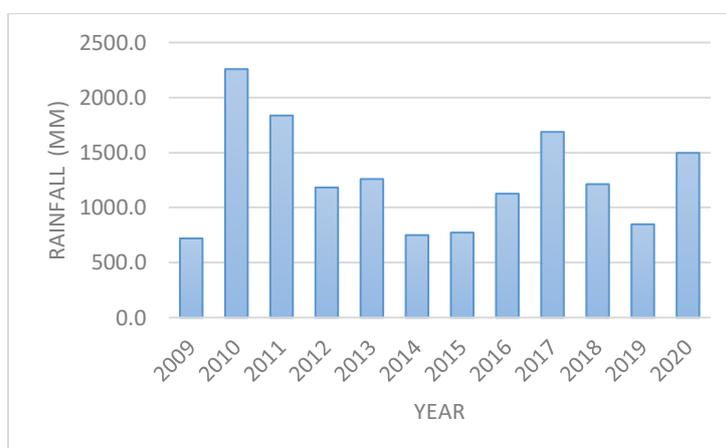

Parameter	October	November	December
Rainfall (mm)	227.07	253.54	0.127
Temperature maximum °C	31.88	30.55	30.8
Temperature minimum °C	19.55	19.38	17
Relative humidity maximum (%)	94.9	95.1	92.6
Relative humidity minimum (%)	43.8	44	37.9
Predominant wind direction (°)	ENE	ESE	NE
Average wind speed (m/s)	3.56	3.78	6.13

The rain gauges registered the following precipitation:

	October	November	December
La India (mm)	196.9	339.7	0.0
Agua Fría (mm)	197.61	372.11	0.0
La Mestiza (mm)	143.25	349.25	0.0

In October, a total of 227.07 mm of precipitation were registered by the digital weather station, about 100mm less than in September. However, in November rainfall increased due to two unusual hurricane events, since historical average of rainfall in November in the area is 53 mm.

The annual rainfall registered was 1462 mm, higher than the annual average of 1200 mm for the area.

3.1.1.4. River sediment study

As part of the environmental baseline studies, and Condor's commitment to implementing international standards, a river sediment study took place in October this year. The study included sampling in 6 sites, selected to cover streams located with its main projects: La India, America and Tatiana. Samples were taken by lab technicians from the Biotechnology lab of the National Autonomous University of Nicaragua.

The most relevant results showed the presence in high concentrations of arsenic, cadmium, and lead in all sites. Cyanide was not detected, even though it is used in artisanal cyanide ponds.

Photograph 3.1.1.4. a. Sediment sampling downstream of OP, Aguas Calientes stream; b. lab technicians preparing the sample

3.1.1.5. Acid Rock Drainage kinetic study

As part of the environmental baseline studies, and Condor's commitment to implementing international standards, a more detailed study was implemented with a geochemistry expert. The study is an on-site experiment to determine the potential for ARD and metals leaching in the waste rock that will be generated during the lifetime of the mine, by exposing samples of waste rock from cores to normal climatic conditions (rain) considering different types of rocks from the main projects. Leachates are then collected and analysed.

The official results of this study will be presented by the expert in January 2021. However, preliminary results suggest that the geochemical composition of the natural leachates monitored do not have the potential for the formation of acid rock drainage or metal leaching..

Photograph 3.1.1.5. a. Kinetic field test (left) and core samples in one of the reactors (right)

3.2. ENVIRONMENTAL MANAGEMENT

Condor continues implementing its Environmental and Social Management System, in compliance with internal policies and international standards. However, Condor went back to normal working in November, under sanitary measures and social distancing guidelines.

The Environmental Management System continued to be implemented with the following activities: monitoring of groundwater and surface water level, monitoring of weather parameters, water management, waste management and recycling, maintenance of the tree nursery “Oro Verde”, maintenance of four reforestation areas located in La India and Real de la Cruz concessions; implementation of the Participatory Water Monitoring Program including water quality sampling in La India, America and Tatiana projects, and presentation of results of the 2nd quarter; daily 5-minute talks to environmental workers; support to social team, project area, land acquisition area and administrative area; environmental awareness activities with co-worker; and support to León zoo as part of the Biodiversity program.

Other activities included delivery of the environmental quarterly reports to government institutions, baseline studies advance on SWWB, follow up on the kinetic study for ARD, river sediment sampling, coordination of the water project and its environmental application process, update of the forestry inventory in the three projects, environmental supervision during drilling campaign, as well as the earthworks for the two new viewpoints and supervision of clearance of the areas within the plant location. We also received the site inspection for Espinito-Mendoza and Cacao concessions by government institutions as part as their monitoring and follow-up.

3.2.1. Environmental Management System implementation

3.2.1.1. Environmental Awareness

Environmental Awareness activities were limited to meetings organized with seven villages to present results of the water quality sampling done in July 2020, which were postponed until December due to Covid-19, (as detailed in section 3.2.1.2); daily 5 minute talks with workers; and the end of the year activities addressed to workers.

Other activities related to environmental awareness were the donations to the Leon zoo which included signs for the species and food and medicine for the birds.

(a)

(b)

Photograph 3.2.1.1. (a) Donation of food for birds to León Zoo, (c) Donation of plants to workers as part of the environmental awareness activity

3.2.1.2. Participatory Water Monitoring Program

On 4th December the water sampling in the Tatiana and America projects area took place; however, road access was difficult due to weather conditions and two places were not reached to take the water samples.

On 10th December the water sampling for the Participatory Water Monitoring Program of La India project took place. 9 sites were sampled, and a duplicate was taken as part of the quality control. Results will be received in January 2021. Only MARENA-León and Alcaldía El Jicaral participated as institutions, MEM was unable to attend as well as Alcaldía Santa Rosa del Peñón. Local representatives waited at their village wells to supervise the sampling but did not accompany the team to all sites due to Covid19 restrictions.

Photograph 3.2.1.2. (a). Ocotillo upstream (left), Nance Dulce public well (right) sampling for La India project

Also in December, socially distanced meetings in the seven villages were organized so as to inform local residents of the results of July 2020 water sampling conducted as part of the Participatory Water Monitoring Program. A total of 131 people participated. The meetings were held in El Carrizal, La India, Agua Fría, El Bordo, Nance Dulce, El Cristalito and Ocotillo villages. Participation was conducted with limited participants; and interaction was reduced to a minimum.

During the above, the new hydrologist was introduced and participated as part of the environmental team.

(a)

(b)

(d)

Photograph 3.2.1.2.b-f. (a) El Bordo village, (b) El Carrizal village and (d) Cristalito village.

3.2.1.3. Waste management program implementation

Activities related to waste management continued in La India concession and in the company's premises during this quarter.

During this quarter, 455 lb of general waste was collected and delivered to the community waste dump; 153 lb of organic waste were sent to the composting area within the company and glass, paper-cardboard and plastic were stored for recycling.

During the daily 5-minute talks, the Waste Management Manual was explained to refresh the importance of recycling and separating at source.

Photograph 3.2.1.3.(a) Signs of containers of classification of waste within the company

3.2.1.4. Soil protection and biodiversity conservation

As part of the remediation and biodiversity conservation efforts, Condor continues with its tree nursery in La India concession. Also, Condor continues implementing the reforestation plans in 7.13 ha located in Nance Dulce, Soledad de la Cruz and Los Rastrojos villages under agreement with landowners and in Alpha 6, a property of the company. During this quarter, the reforestation plan included maintenance activities such as watering and fertilizing, weed removal, and replacement of lost trees.

Condor continues its monthly donations to the Arlen Siu Zoo in León implemented since Q4 2019, as part of Condor’s commitment to the protection of biodiversity, which was mentioned in section 3.2.1.1.

Furthermore, as part of the soil protection program, site inspections were conducted in the areas of drilling campaign, geotechnical drilling, and earthwork for the viewpoints and road access. These inspections are done prior, during and at the end of the activities to ensure that environmental measurements are implemented, and negative impacts are prevented or minimized. The areas are then remediated and rehabilitated to ensure soil conservation, reduce potential erosion process and sedimentation of rivers.

3.2.2. Tree Nursery “Oro Verde”

The tree nursery “Oro Verde” provides the trees for all reforestation areas in the Condor concessions. By the end of this quarter, a total of 5439 plants were watered, fertilized and clean from weeds and pests as part of the maintenance program of the tree nursery Oro Verde.

There was a decrease in plants affected by disease and too much water due to the hurricane events in November. Mostly ornamental and medicinal plants were affected.

Photograph 3.2.2.. a. Maintenance of tree nursery “Oro Verde”

Activities in the reforestation areas included cleaning, fertilizing, watering, pest control. A total of 76 trees were used to replace trees in the reforestation area of Nance Dulce.

3.2.3. Implementation of reforestation plans and activities

3.2.3.1. La India concession – reforestation activities

Maintenance of reforestation areas in Nance Dulce, Los Rastrojos, and within the company’s property ALPHA 6, continues. This activity is required to ensure the survival of the trees planted and are part of the environmental commitments of the company in the La India environmental permit.

Activities in the reforestation areas included cleaning, fertilizing, watering, pest control. A total of 76 trees were used to replace trees in the reforestation area of Nance Dulce.

Photograph 3.2.3.1. a. Maintenance of reforestation areas in Nance Dulce

3.2.3.2. Real de la Cruz concession – reforestation activities

Maintenance of the reforested area in Soledad de la Cruz village continued. This included watering, weed removal, fertilizing and pest control of the trees.

Photograph 3.2.3.2.a-c. Reforestation areas in Soledad de la Cruz village in Real de la Cruz concession

3.3. OTHER ACTIVITIES

3.3.1. Water Project for La India and Agua Fría villages

The coordination of the Water Project was assigned to the hydrology section of the environmental team, which was given responsibility for the construction and installation of the plant (see below), and its preparation for use.

La India Gold SA (LIGSA), within the framework of its commitments to the population of the Santa Cruz de La India community and under the framework of its Corporate Social Responsibility programs, in 2020 began its organizational and logistical efforts to improve its Fresh Water program and acquire a potable water plant. This is a new water project that benefits the residents not only of Santa Cruz de La India community but also extends this benefit to the neighboring village of Agua Fría, which has the same need for this vital resource.

At the end of September, AQUATEC was contracted for the delivery of a pressurized plant for the purification of water. This component is of great importance and contains the necessary elements to achieve one of the main objectives of the project, which is having sufficient capacity to produce good quality potable water for the population. Its portability enables it to be located close to the water source selected for the required supply. Currently the plant is in the storage area of the supplier in Nicaragua and its transfer and installation is planned for the next few weeks.

The water project was structured in two phases, one long-term, entailing support and / or coordination with local authorities to contribute to a process of execution of the drinking water system for the entire community; and short-term, which is currently being executed and consists of establishing a system for processing bottled water in 5-gallon drums, to benefit more than 1,200 people in two villages and thereby generating new jobs.

A general diagnosis of the current state of the community's water needs was carried out, which enabled decisions to be taken about how LIGSA can contribute to improve the quality of life of the population in their areas of use. The whole system will be installed on one of the Company's properties. It is expected that the project in its first phase will start operations towards early April 2021.

4. SOCIAL ACTIVITIES

4.1. STAKEHOLDER ENGAGEMENT IMPLEMENTATION

4.1.1. Meetings with local stakeholders

During this quarter, the company held more than 24 meetings with the leaders of the social programs to coordinate the activities carried out with the members of the programs and the community in general.

Main topics addressed were:

- Water program
- Senior program
- Social contributions
- Business program
- APROSAIC
- Artisanal mining
- Youth in action
- Happy childhood

4.1.2. Bilateral meetings with local stakeholders

Bilateral meetings

During this period, the company held 18 bilateral meetings, with local organizations in the Area of Direct Influence (ADI) and with NGOs and/or institutions interested in collaborating with social programs.

4.1.3. Communication campaign

During the quarter, the communication strategy continued to be executed using various methodologies such as: house-to-house visits, meetings with leaders of the boards of directors of social programs, use of Facebook, YouTube and the Company's website. With the use of these communication channels we were able to be in direct contact with the population and disseminate our work.

4.2. COMMUNITY RELATIONS PLAN IMPLEMENTATION

La India Gold developed a social investment plan oriented to generate conditions to promote better community relations in the areas of direct and indirect area of influence of the project; with a focus on water, communication, support for small mining, among other contributions and programs.

During the quarter, the investment was **US \$ 50,380.00** in the following items:

Social Investment					
N°	Area	October	November	December	Total
1	Communication	3,281	3,725.00	4,447.00	11,453.00
2	Water	2,148	2,529.00	2,967.00	7,644.00
3	Artisanal Mining	1,074	549.00	3,814.00	5,437.00
4	APROSAIC	1,143	1,317.00	2,203.00	4,663.00
5	Seniors	1,305	1,617.00	1,273.00	4,195.00
6	Small businesses	500	600.00	600.00	1,700.00
7	Others	1,192	1,368.00	12,728.00	15,288.00
Total		\$ 10,643.00	\$ 11,705.00	\$ 28,032.00	\$ 50,380.00

Table # 1. Social investment IV quarter 2020

Contributions and Donations Program

During the months of October, November and December, the delivery of contributions was distributed as follows: transportation (4), contributions to churches (4), other contributions (73), health (8), infrastructure (1), sport (1) and community mourning (4).

Individuals and institutions have been indirectly benefited, representing a broad reach of the program in the communities.

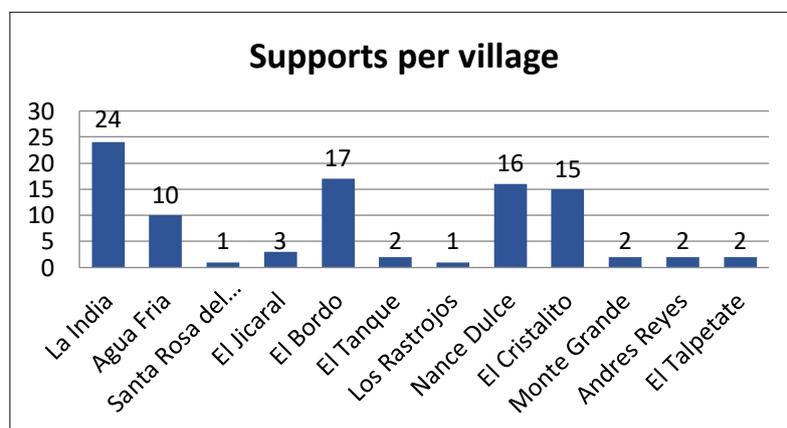

The contributions and donations delivered in various areas are set out below:

ITEM	ACTIVITY	BENEFICIARIES	COMMUNITIES	MONTH
Community grief	Delivery of products for relatives of the deceased in the community of Los Rastrojos.	1 family	Los Rastrojos	October

Church support	Delivery of economic contribution to El Jicaral church for religious activities.	Parish members	El Jicaral	October
Sport	Delivery of 25 sports uniforms to soccer players in the community of El Cristalito.	Team members	El Cristalito	October
Other contributions	Loan of awning to Santa Rosa del Peñón mayor's office, recreational activity.	Santa Rosa del Peñón Mayor's Office	Santa Rosa del Peñón	October
	Delivery of packages with basic products.	03 seniors	Nance Dulce	October
		03 seniors	El Bordo	October
		03 seniors	El Cristalito	October
Health	Delivery of cleaning accessories to MINSa personnel.	Health center	Santa Cruz de la India	October
	Support in conducting medical examinations to the patient.	01 beneficiary	Santa Cruz de la India	October
Transport	Transfer of patient from Matagalpa to India.	01 beneficiary	Santa Cruz de la India	November
Community mourning	Delivery of products for relatives of the deceased.	02 families	Santa Cruz de la India	November
Church support	Delivery of economic contribution to El Jicaral church for religious activities.	Parish members	El Jicaral	November
	Delivery of products for Catholic celebration	Parish members	Nance Dulce	November
Other contributions	Delivery of packages with basic products.	02 beneficiaries	Santa Cruz de la India	November
	Tent loan to relatives of deceased.	01 family	Monte Grande	November
	Delivery of used tyres to applicants.	02 beneficiaries	Nance Dulce y Santa Cruz de la India	November
Health	Payment to carry out medical examinations to a patient	01 beneficiary	Santa Cruz de La India	November
	Support for transportation of applicant requiring therapy, to León city.	01 beneficiary	Santa Cruz de La India	November
	Support for the purchase of ophthalmic lenses.	01 beneficiary	Santa Cruz de la La India	November
	Delivery of medicines to applicant.	01 beneficiary	El Capulin/Tanque	November
Infrastructure	Delivery of paint to applicant.	01 beneficiary	El Cristalito	November
Transport	Transfer of construction materials to the villager.	01 beneficiary	Andrés Reyes	December
	Transfer of toys to primary school boys and girls.	Elementary students	Talpetate	December
	Transfer of toys to primary school boys and girls.	Elementary students	Tanque	December

Church support	Donation to El Jicaral church for religious activities.	Parishers	El Jicaral	December
Other contributions	Delivery of packages with basic products.	06 beneficiaries	El Talpetate y Santa Cruz de la India	December
	Loan of an awning to carry out religious activity.	01 beneficiarie	Santa Cruz de la India	December
	Delivery of Christmas gifts to beneficiaries from the different communities surrounding the project.	10 beneficiaries	Nance Dulce	December
		5 beneficiaries	Santa Cruz de La India	December
		10 beneficiaries	El Cristalito	December
		10 beneficiaries	Agua Fría	December
		1 beneficiarie	Monte Grande	December
14 beneficiaries	El Bordo	December		
Health	Delivery of medicines to applicant who required medical attention.	01 beneficiarie	Nance Dulce	December
	Delivery of pediasure milk to disabled child.	01 beneficiary	Santa Cruz de la India	December
Community grief	Delivery of basic products to relatives who have lost a loved one.	01 beneficiary	Andrés Reyes	December

Support per village:

Fresh Water Program in the Santa Cruz of La India community

During this quarter, the delivery of two free water drums and two subsidized water drums each month was maintained, directly benefiting 392 households in the Santa Cruz de la India and Agua Fría communities, these communities are within the area direct impact of the Mina La India project.

Support was also provided to vulnerable sectors: Seniors, people with disabilities and multi-household families through the free delivery of the four water drums. With this, we reduce the water shortage in the area and intestinal diseases in beneficiaries, providing residents with quality water for their consumption.

In the Santa Cruz de la India community, 2,623 fresh water drums have been delivered in this period.

Activities within the water program:

- 263 families continue to receive their water canisters on a weekly basis.
- 263 families received recommendations on cleaning the bottle and dispenser to prevent virus infections.
- Information was given on preventive measures against the Coronavirus during the delivery of the bottles.
- Dispensers were delivered to the newly registered beneficiaries.
- Christmas Festival with beneficiaries of the Agua Fresca program in the communities of Santa Cruz de La India and Agua Fría.

Month	Free	Subsidized	Total
October	567	207	774
November	555	223	778
December	672	399	1071

Community	Vulnerables	Beneficiaries	Total
Santa Cruz De La India	82	181	263

Fresh Water Program in Agua Fria community

The fresh water program reaches every home in the Agua Fría community, also permanently benefiting families, where there are older adults and people with disabilities.

In the community, 1,003 drums of purified water were delivered in the fourth quarter of 2020.

Activities within the program:

- 129 families receive their water drums weekly
- 129 families received recommendations on cleaning the bottle and dispenser for virus prevention.
- Christmas Festival with beneficiaries of the Agua Fresca program in the communities of Santa Cruz de La India and Agua Fría.

Month	Free	Subsidized	Total
October	208	103	311
November	211	79	290
December	229	173	402

Community	Vulnerables	Beneficiaries	Total
Agua Fría	33	96	129

Program - Agua es Vida

The Water is Life program, for this year 2020, has focused on 3 main axes: water, community health and education. Therefore, different activities have been carried out that contribute to the strengthening of these axes. Focusing our commitment on community health due to the current COVID-19 pandemic, helping to improve the community health quality with activities of prevention messages and correct handling of solid waste in Santa Cruz de la India village, as well as support to people with disabilities.

Members within the program: 160

Activity	Beneficiaries		Results	date
	F	M		
Solid waste removal in areas of the Santa Cruz de la India community.	1085		<ul style="list-style-type: none"> ■ 35 bags of plastic bottles. ■ 3 bags of glass bottles. 	October
Cleaning of 12 metallic containers for solid waste collection, new labels were also placed.	1085		<ul style="list-style-type: none"> ■ The 12 metallic containers were cleaned. 	October

Business Program

The board of directors of the Santa Cruz de la India local businesses program, with the support of Proyecto Mina la India, continued during the last quarter 2020 with a campaign on the implementation of hygiene and prevention measures to avoid the coronavirus spread. The activities were carried out through house to house visits to business owners to share information on how to avoid infections and prevent the spread of the virus.

Activities focused on financial education were also carried out, providing training to members of the community savings program and motivating businesses owners to manage their businesses well.

As part of the training, the first village bank was formed in Santa Cruz de la India, which benefits businesses owners, who are part of the community savings program.

The quarter closed with 80 members in the program.

APROSAIC

APROSAIC has focused its work on cultural initiatives, strengthening relationships with community leaders, local schools and cultural activities. During this quarter, APROSAIC focused on executing activities related to Covid-19 prevention. The activities in detail below:

a) Communities' local leaders

✓ Health circle

Due to Covid-19, APROSAIC and Condor Gold organized health workshops to 60 elder villagers from five communities aiming to increase awareness about symptoms of tropical diseases during rainy season and how to prevent them. Also, each participant received a package with Vitamin C, Tizana tea and zepol (eucalyptus ointment).

✓ **Liquid Soap fabrication**

Due to Covid-19, APROSAIC and Condor Gold organized a workshop to teach community leaders to elaborate liquid soap to keep this product in public sites of each community. Leaders from each community must replicate the workshop to teach more people in their village.

✓ **Liquid Soap fabrication (knowledge replication)**

In December, the second part of workshop to elaborate liquid soap was executed in which leaders from each community replicated the workshop in his community to multiply the knowledge to other community members.

✓ **Apostolade in La India**

Condor Gold and APROSAIC decided to support vulnerable villagers from La India village, affected by IOTA hurricane by providing food baskets. A total of 8 village elders received the benefit.

✓ **End of year assembly**

Condor Gold and APROSAIC conducted its annual assembly to celebrate the end of year activity with local leaders group and to deliver a presentation to show all the activities promoted by the company and APROSAIC in each community. A total of 18 leaders from 6 communities participated.

b) Dancing course

Dancing course activities re-started on 6th December, implementing a Covid-19 protocols. The group was split in two to reduce the number of students, the first group receives classes from 8 am to 12pm, and the second has class from 1pm to 5pm, both on Saturday.

COPTRAMIN INVOLVEMENT GROUP

✓ **Safety campaign**

In December, a safety campaign was conducted, in which the company provided a hammer and safety gloves to all groups working in the cooperative’s land from the 1st to 15th December. Also, groups, were informed about the drilling campaign in the area. A total of 95 artisanal miners organized in 17 groups were benefited by the safety campaign.

✓ **End of year activity**

The board and Condor Gold celebrated the end of year with members of the program by giving a Christmas chicken to each member. All participants were grateful to the company for continued support to them year long through this social program.

✓ **Improving internal road of El Bordo community**

Board members attended a request from El Bordo community to improve the internal road of this community which is in poor condition. The board contacted Condor Gold and El Jicaral mayor's office for; and also conducted house to house visits to collect funds. To execute the work, El Jicaral mayoralty provided a backhoe and the fuel was provided by the community (43%) and Condor Gold (57%), as well as the cost of rocky material, of which the company provided 51% and community 49% of the cost.

INDEPENDENT ARTISANAL MINERS INVOLVEMENT GROUP

✓ **End of year assembly**

Condor Gold and the board organized an end of year activity with artisanal miners to review the activities done during the year and to know their perceptions for 2021.

4.3. IDENTIFICATION OF VULNERABLE FAMILIES

Santa Cruz de la India's Seniors Program

During the quarter, the Board of Directors of the Seniors Program maintained a hygiene and prevention campaign due to the Coronavirus, a pandemic that continues to affect the world and especially the most vulnerable sector, the elderly.

In compliance with the health guidelines, chronically ill patients were visited, and special visits were made to all members of the program to perform brain gymnastics exercises as it allows them to reduce daily stress that affects their cognitive faculties, and combats delayed motor skills, memory loss and concentration.

A Christmas gift was also shared with all members of the program through house-to-house visits, during which they were informed about all the activities that were carried out in the program during 2020.

The self-sustaining projects medicinal garden “Los Abuelos” and “Piñatas y Variedades” worked actively during the last quarter.

We closed the quarter with 95 members in the Seniors program.
